

Kenton Post 2

Research info

Our district is pushing out netbook carts and Promethean boards for every classroom from grades 3 through 12. I did some research about Promethean boards and these are some things I learned:

- 1) [Promethean planet](#) is a website that offers lessons and templates that can be downloaded.
- 2) Teachers can upload what they create to Promethean planet so others can use them.
- 3) Promethean has a troubleshooting area for fixing issues on their website
- 4) ActiveBoards have to be regularly be re-calibrated with the laptop they are connected to
